Jenkins installation in windows

Download Jenkins

https://www.jenkins.io/doc/book/installing/windows/

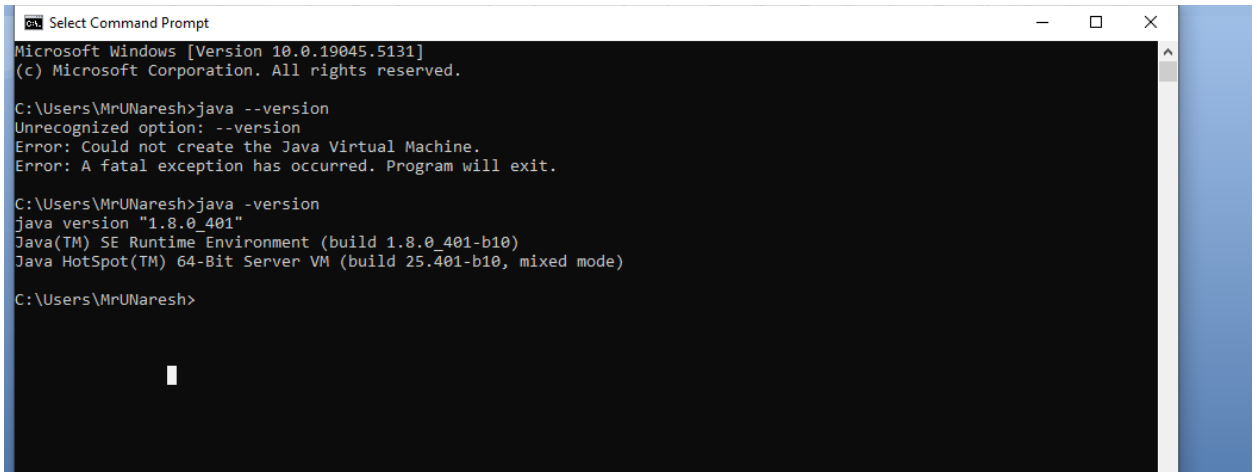
Thenk click on Downloading Jenkins

https://www.jenkins.io/download/#downloading-jenkins

Then click on windows

After downloaded Jenkins we have to check java version in CMD prompt

Java –version



So now install java 17 version to support Jenkins

Now download java version 17 so search as jdk 17 for windows

https://www.oracle.com/java/technologies/javase/jdk17-archive-downloads.html

Then click on Windows x64 Installer

After downloaded install it and check in CMD to verify version is updated or not?

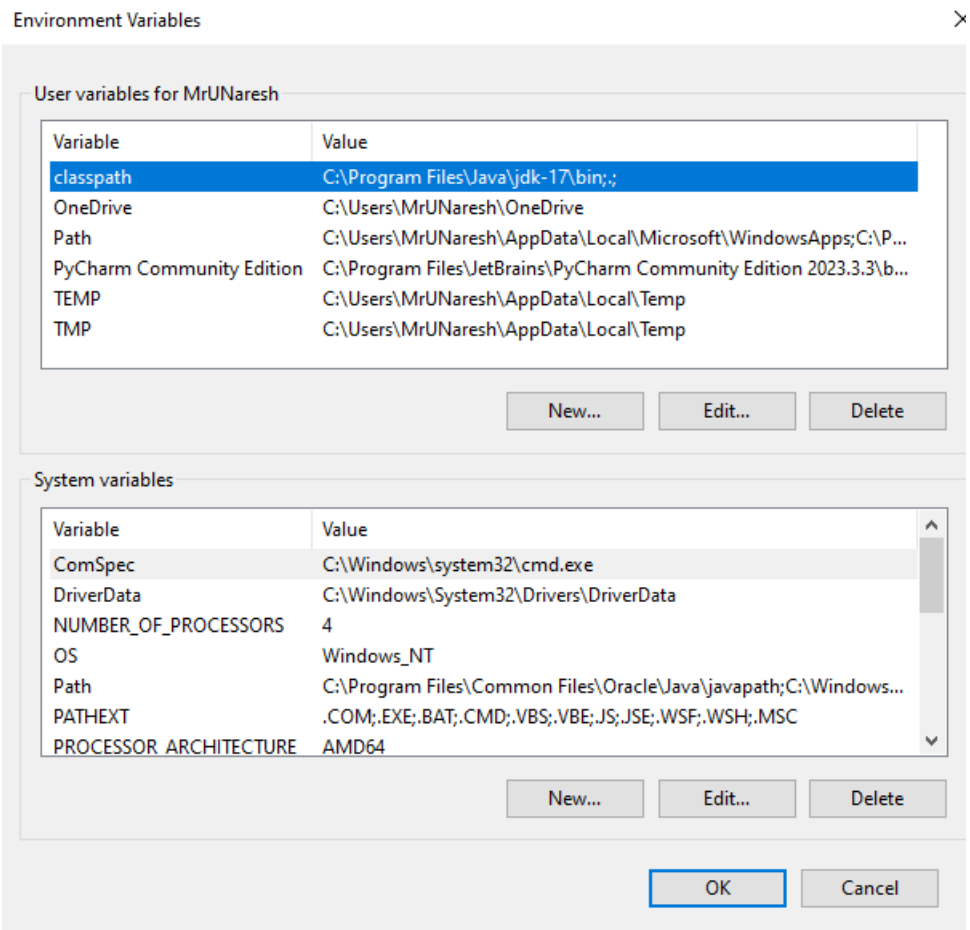
Command Prompt

```
Microsoft Windows [Version 10.0.19045.5131]
(c) Microsoft Corporation. All rights reserved.

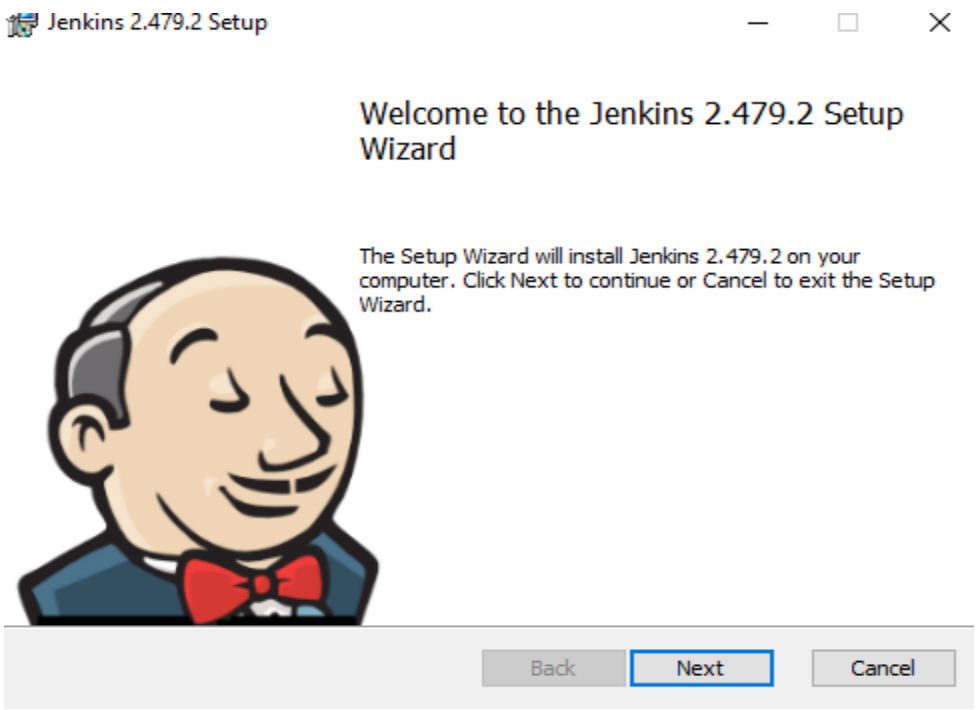
C:\Users\MrUNaresh>java -version
java version "17.0.12" 2024-07-16 LTS
Java(TM) SE Runtime Environment (build 17.0.12+8-LTS-286)
Java HotSpot(TM) 64-Bit Server VM (build 17.0.12+8-LTS-286, mixed mode, sharing)

C:\Users\MrUNaresh>
```

Now setup the class path



Now install and setup the jenkin



Jenkins 2.479.2 Setup
Welcome to the Jenkins 2.479.2 Setup Wizard
The Setup Wizard will install Jenkins 2.479.2 on your computer. Click Next to continue or Cancel to exit the Setup Wizard.

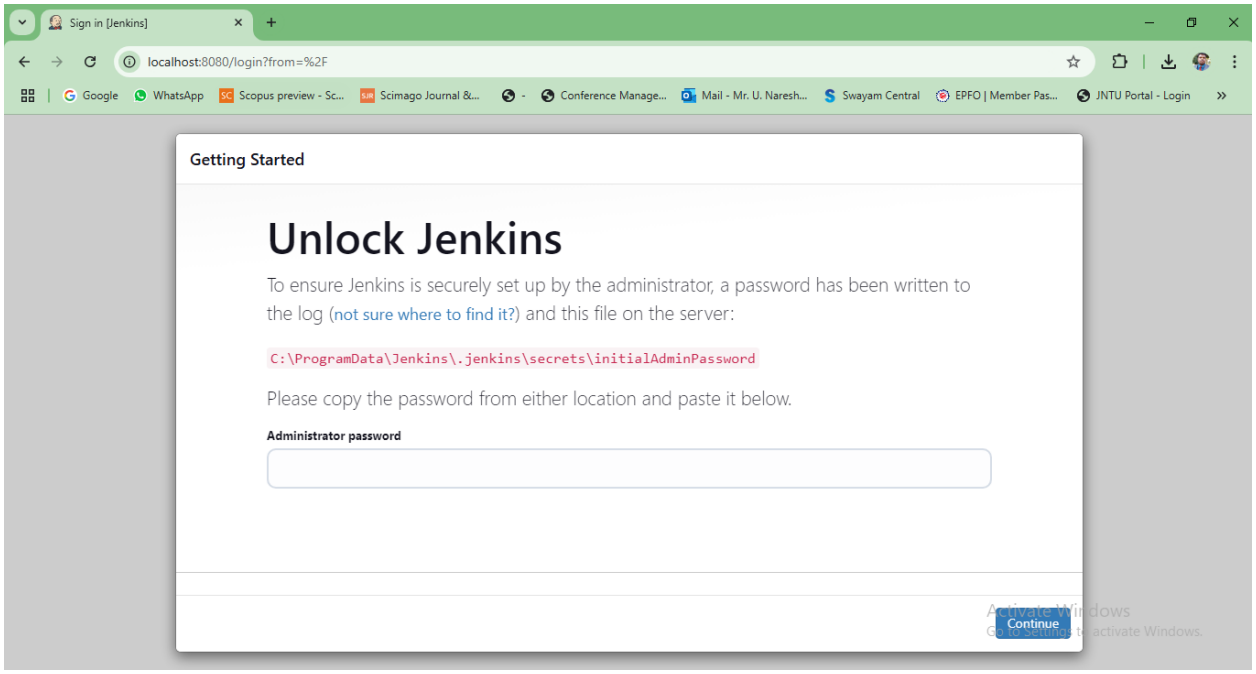
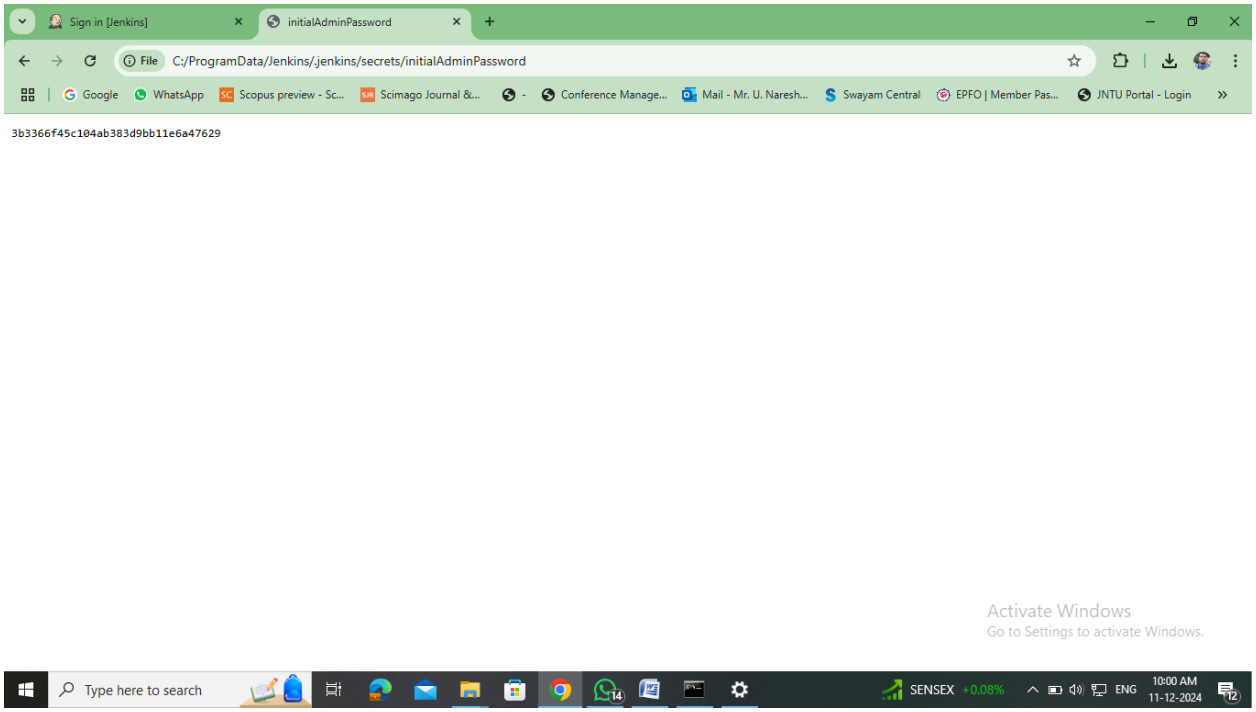
Now go to browser

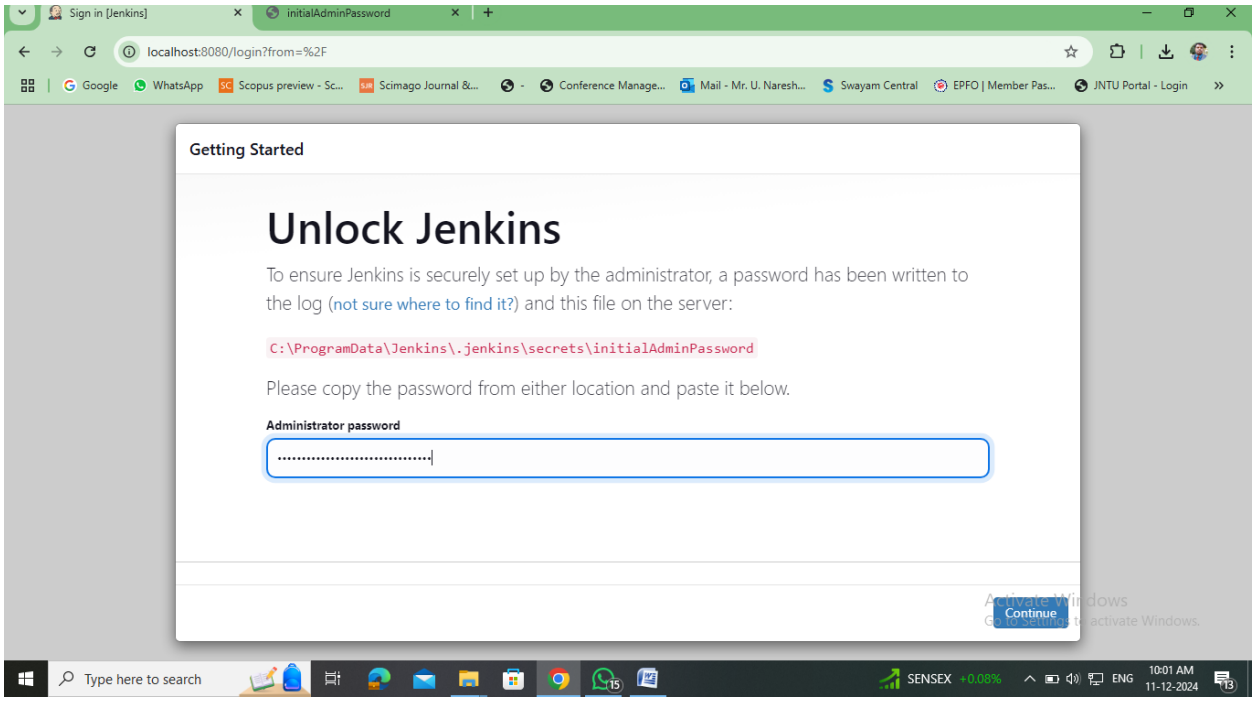
Give url as localhot:8080



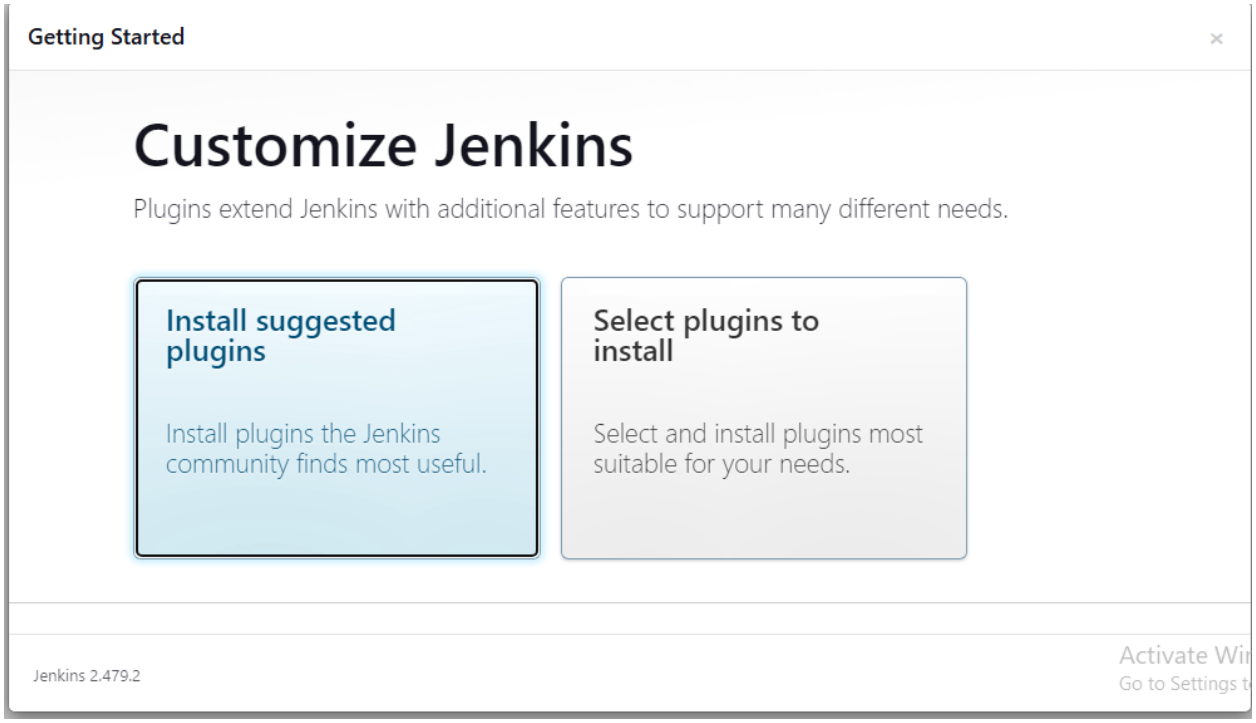
To know the password of it copy red colour url in another tab in browser



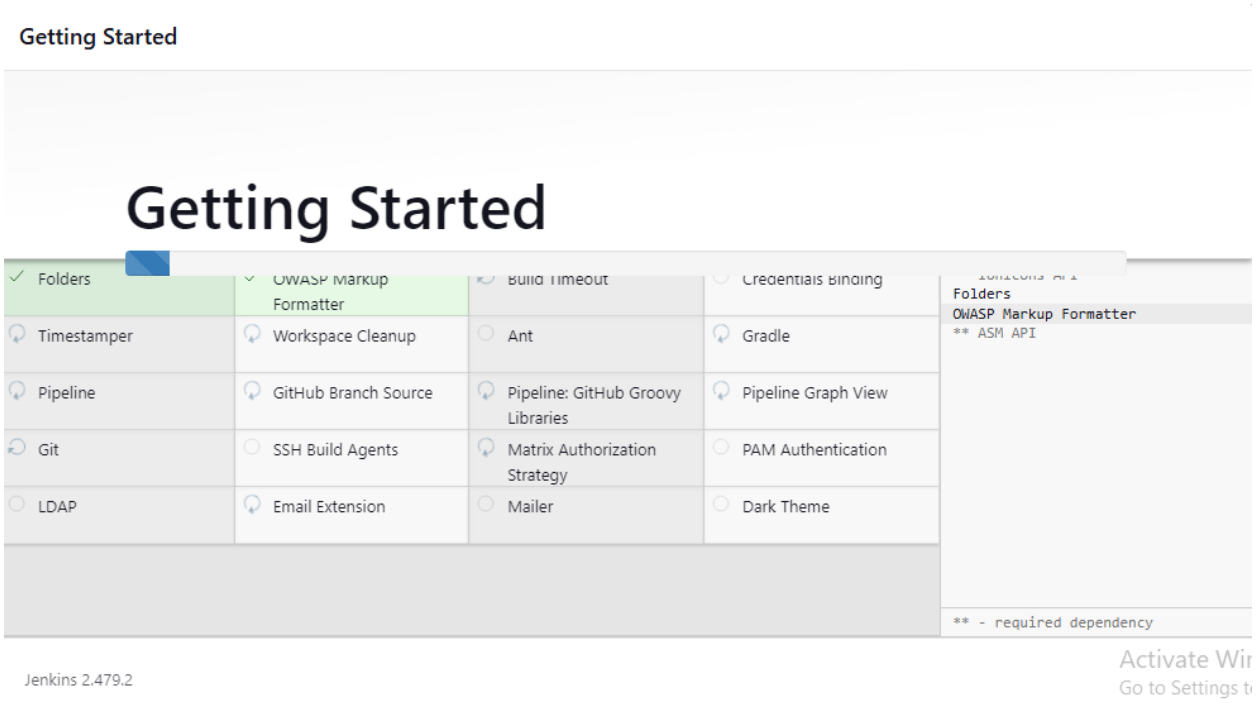
Now copy the password and past in login creation window



Then click on continue



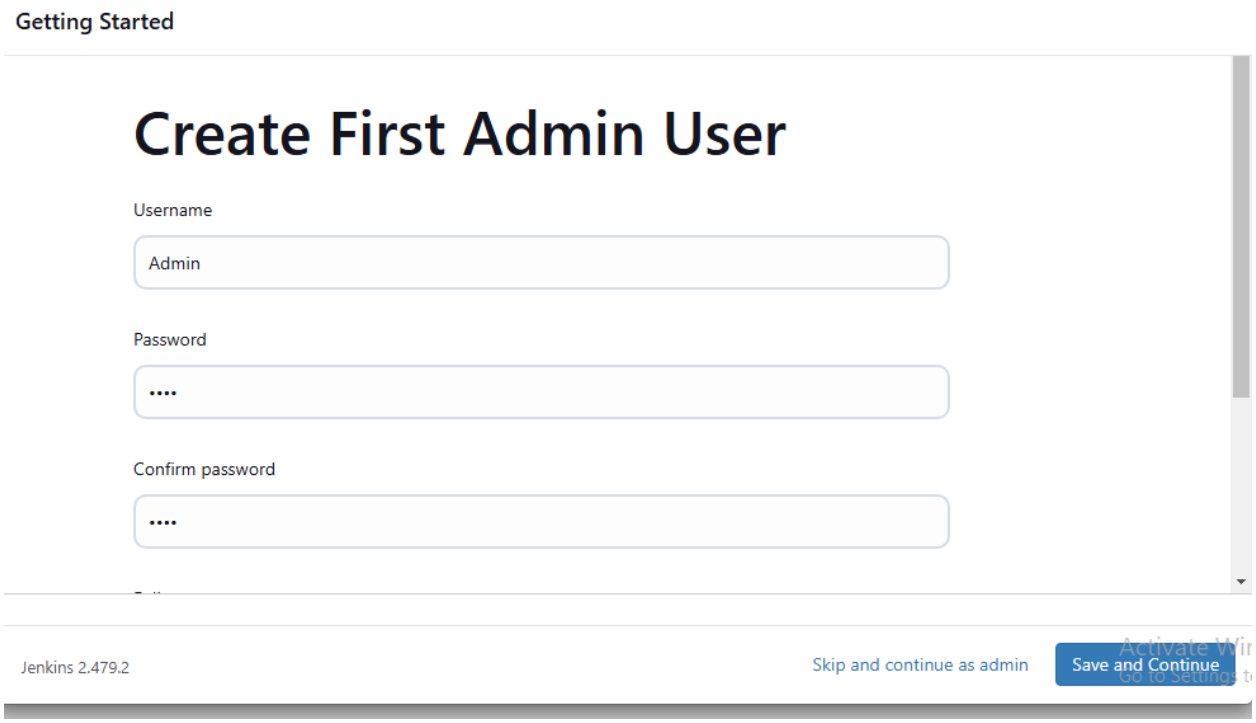
Now click on install suggested plugins

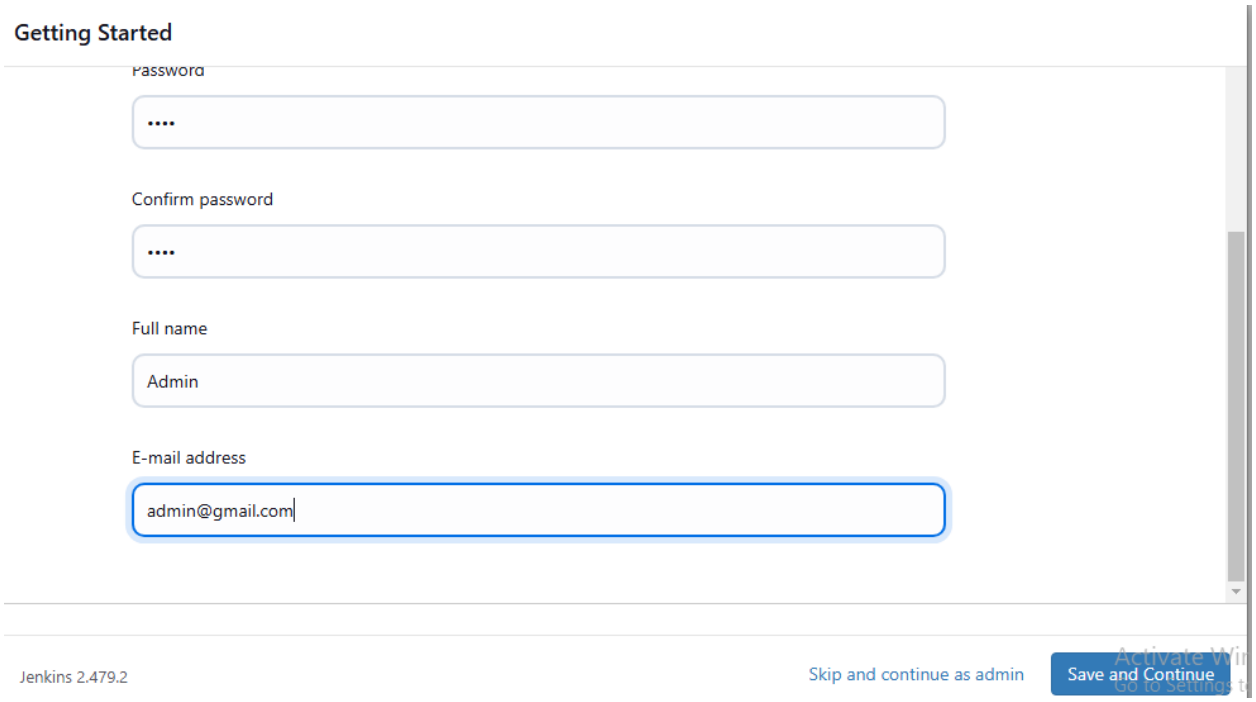


Now create user

UN: Admin

PW:1234





Getting Started

Instance Configuration

Jenkins URL: http://localhost:8080/

The Jenkins URL is used to provide the root URL for absolute links to various Jenkins resources. That means this value is required for proper operation of many Jenkins features including email notifications, PR status updates, and the `BUILD_URL` environment variable provided to build steps.

The proposed default value shown is **not saved yet** and is generated from the current request, if possible. The best practice is to set this value to the URL that users are expected to use. This will avoid confusion when sharing or viewing links.

Jenkins 2.479.2
